MIRGRATING TO THE CLOUD?

5 MISTAKES TO AVOID

1. UNCERTAINTY

Uncertainty about the cloud is stalling your innovation.

Organisations fail to realise the status quo is not working, although they need to stop over - thinking and start doing. Let's start experimenting today!

2. NO PLAN

Not having an action plan for the business to address common challenges for cloud adoption.

Leverage the AWS Cloud Adoption Framework (CAF). https://aws.amazon.com/professional-services/CAF/

3. DESIGN

Not architecting for the cloud and not reviewing traditional operational practices.

Leverage the AWS Well-Architected Framework (WAF) Tools. https://aws.amazon.com/architecture/well-architected/

4. SECURITY

Assuming security is an issue.

Security & compliance is baked into the cloud – You can get more for less.

5. NOT PARTNERING

Not partnering and doing tactical procurement.

Deep partnerships flatten the learning curve and de-risk your migration to the cloud.
